QUINZE & MILAN DESIGNERS

ABOUT THE QM LIFESTYLE, CULT AND LABEL.

All these great-looking pieces of furniture? Of course you can sit on them. Put your feet up, lean back, dip a chip, sip a Seltzer, and chill out on an original Quinze & Milan. Just keep in mind that Quinze & Milan collections go beyond **furniture design**.

Our products are statements, and prompt you to spin tales, to dream and to shape a reality all your own. These are **designer pieces** that imbue a space with meaning by skirting the edges of all that is obvious. Pieces that exude energy and push the envelope of design. From the outset, Quinze & Milan used the slogan **'Creators of Atmosphere'**: a piece of furniture was not an aim in itself but a medium for a **lifestyle** that set out to challenge the reigning minimalism: wild and sexy, carefree and fun, loud and outrageous. Even the most respectable and critical international trade magazines soon welcomed Q&M as the pop star of furniture and the bad boys of the design world: **a bit of punk, but also a bit of Prada**.

Quinze & Milan is not a typical furniture label but an avant-garde platform for collaborations, **a think tank and factory for ideas**, designs, visual culture, concepts and experiments.

It's this approach that made Quinze & Milan turn into a successful label that guarantees rock 'n roll, creativity, comfort, quality, excitement and ingenuity.

AIRBENCH SINGLE

DESIGN QUINZE & MILAN / 2008

design Quinze & Milan

As an ultimate communication tool, an Airbench setting creates a landscape of human interaction. Available in variable shapes — crosses, rectangles or meanders — air-benches are multifunctional and modular, offering endless combination possibilities. Airbenches Small and Large move tortuously in public spaces. By accident people meet each other as they take place on the bench and immediately look into the opponents eyes. Airbenches are the ideal communication tools in public areas; musea, exhibitions, libraries, lounges, airports, waiting areas,...

» ITEMS AVAILABLE UPHOLSTERED IN LEATHER & FABRIC

ANTON LINEAR

ANTON DENYS / 2014

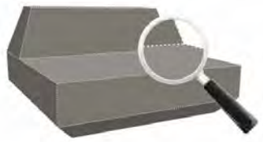

The ANTON collection, designed by Anton Hendrik Denys, joined the Quinze & Milan family in an almost natural compatibility.

The Corner, Linear and Level square-based units play perfectly together, or can proudly stand individually.

The Anton is very flexible for use in public spaces, but works equally wel for home and garden settings. By pointing the base inwards, the design feels very light, almost floating, but the units are very strong and comfortable.

BRILLO ANDY WARHOL

QUINZE & MILAN DESIGN / 1999

The original Warhol Brillo Box sculptures from 1964 that altered western art, popularizing the ubiquitous and commercial, have now come full circle as inspiration for utilitarian objects destined to become design classics. Each is made of Quinze & Milan's patented high density QM FOAM™ and screen-printed with the iconic Brillo logo.

''Fab's discerning eye, democratic approach to design and love of art make them the ideal partner for this project and echo Warhol's philosophy, best summed up by his own words, 'Pop Art is for everyone','' states Michael Hermann, The Andy Warhol Foundation's Director of Licensing. ''It is this democracy of design and connection with the world's leading artists and designers that attracts millions to Fab.com.''

» Celebrating the design legacy of Andy Warhol twenty-six years after his death, Quinze & Milan has joined The Andy Warhol Foundation to create the Brillo Box Pouf.

CLUB SOFA 01

QUINZE & MILAN DESIGN / 2005

Simple, plain, bold: three words that describe the body language of CLUB, a design that seems to say: 'If the basics are right, who needs ornament?' Made from our proprietary QM FOAM™, CLUB is happy indoors and out.

After many succesful years, CLUB is now enhanced with a series of new shapes and solutions. Especially the loose cushions are important additions. The seating cushions are made of a combination of memory foam and wadding to create extreme softness and comfort in just a few centimeters of thickness. The back cushions are made of goose dawn. All loose cushions have removable covers.

The new lateral units come with a straight back on the inside. Versions with an inclined back are available upon request.

CLUB LATERAL 02

QUINZE & MILAN DESIGN / 2005

Simple, plain, bold: three words that describe the body language of CLUB, a design that seems to say: 'If the basics are right, who needs ornament?' Made from our proprietary QM FOAM™, CLUB is happy indoors and out.

After many succesful years, CLUB is now enhanced with a series of new shapes and solutions. Especially the loose cushions are important additions. The seating cushions are made of a combination of memory foam and wadding to create extreme softness and comfort in just a few centimeters of thickness. The back cushions are made of goose dawn. All loose cushions have removable covers.

The new lateral units come with a straight back on the inside. Versions with an inclined back are available upon request.

FRAME ARM 75

DESIGN QUINZE & MILAN / 2004

Part of moving forward is looking backward. FRAME is a 21st-century remake of the old-fashioned armchair. Familiar and fascinating at the same time, FRAME combines a stationary tubular-metal frame with QM FOAM™ or upholstered in leather or fabric all for matchless comfort.

Its fresh, distinctive look complements any contemporary setting, while blending with equal ease into a more classic environment. FRAME includes one- and two-seater settees with and without armrests.

HONEYCOMB

DESIGN CLIVE WILKINSON + INTELLIGENT DESIGN / 2007

Honeycombs one of the oldest architectural concepts known, inspired this design of a flexible shelving system. Of course we had to call it HONEYCOMB. The individual units are made from rotation-molded thin walled polyethylene resulting in an exceptional transparency and rigidity. A straightforward riveting system allows for an efficient and reversible installation with unlimited and flexible compositions. HONEYCOMB ensures an enhanced structural capacity that allows stacking up to 7 meters in two directions and even allow the removal of units within a built wall to create ‘windows’. So keep your things in place, your peeping neighbors out or your friends in and make your own humming environment…

JELLYFISH CHAIR

DESIGN WIEL ARETS / 2006

A relaxing chair that encourages active use is JELLYFISH, a seat for lounging, for listening to music, for having a bite to eat, for talking with friends. The dynamic JELLYFISH is a modern rocking chair. Owing to the rounded form of the base, the chair moves slightly. It's a seat that ruffles the feathers, so to speak, but in a positive way.

The standard JELLYFISH HOUSE collection is produced in sturdy rotation moulded PE which is extremely well suited for outdoor use, the same frame is used as the base for an upholstered edition (leather and Divina by Kvadrat®), therefore few of these chairs have the same outward appearance. The colors are UV stable.

LITTLE MISS O L COMPLETE
CONCRETE AMSTERDAM / 2009

When UN Studio asked them to design certain areas for their major project, the Mercedes Benz Museum in Stuttgart, Germany, CONCRETE AMSTERDAM based all its design-work, down to the very detail on the specific identity of the owner. Their aim was to create identity within a total space experience: create individual worlds where a single visitor identifies with and which invites him to stay. The dishes, table linen and silverware in the restaurant as well as the division of the spaces are all in a way renditions of the three-pointed Mercedes Benz logo.

LITTLE MISS O, which is placed in the children island, is a result from that research and provides an ideal playground where to nurse children and play with them.

M2 FLAT

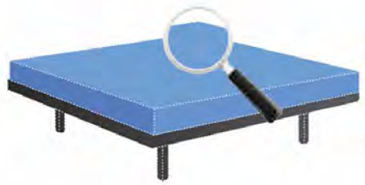

DESIGN SCOTT WILSON / 2003

Flexible by nature and ideal for large public spaces, the M2 is a modular seating system designed by Scott Wilson for Quinze & Milan. Three basic units (corner, linear and level units), each 1m², supported by powder-coated steel frames fit together to form the desired configuration. Components can be interconnected or can stand alone.

Steal elements are powder-coated in standard grey. Sidetable standard grey or black.

MAZE SIDE TABLE HIGH

DESIGN QUINZE & MILAN / 2006

The MAZE collection was born in our studio, but its genes are of the East - MAZE means table in Hindi. Viewed from above, it's almost as if you're looking through the mesh of a net. There's something mysterious about it; it looks different depending on the angle you view it from. Although small in size, the MAZE SIDE TABLE enchants everyone with its suggestion of transparency. Its common sense lies in its flexibility: place it inside, in the living room or in the bathroom, or outside, in the garden - with its plastic body, MAZE SIDE TABLE fits in anywhere.

MAZE SIDE TABLE is light, adaptive, stackable and low maintenance.

» MAZE IS AVAILABLE IN BOTH HIGH AND LOW VERIONS.
» MAZE SIDE TABLE IS STACKABLE
» STACK HIGH AND LOW TOGETHER.

MINUS+ SOLO

QUINZE & MILAN DESIGN / 2006

Playful. Soft. Cosy. Stripped of fuss and frills… MINUS+ emerged from a need for furniture that zooms in on the world of a child. Furniture that stimulates to play and hide and at the same time gets the seal of approval from their parents. MINUS+ already makes a cross over with existing Quinze & Milan classics from the PRIMARY and CLUB collection, all made in QM FOAM™, certified for juvenile use.

At the same time, children specific furniture is announced: High Chair, Play tent, Storage boxes, Screen jungle. Run, play, hide and seek. Grown-ups are welcome to join the fun.
By invitation only.

PENTAGON POUF 35

DESIGN THOMAS TRITSCH / 2007

Don't think one, think five! In his design Thomas Tritsch underlines the sturdy form of the mathematical figure existing out of five corners. Inspired by medieval fortressess proved well-fortified when built as a pentagon. The result is a broad collection combining different materials: qm foam or upholstery in several pieces or in one single piece.

Put the modular collection together in multiple variations and discover its numerous possibilties.

PILOT STOOL

DESIGN PATRICK RAMPELOTTO + FRITZ PERNKOPF

Glossy meets matte, light meets durable. PILOT is Quinze & Milan's new range of stools. Pilot is smart, beautifully detailed, and available in 3 sizes. The design of the stool is based on traditional archetypes, their basic simplicity in form and function. The organically shaped seat is supported by tapered legs made of oiled European oak.

The seat itself is generously proportioned for comfort, its material tactile and contemporary. The ends of the legs are threaded and screwed into the seat, a connection that is both simple and sophisticated given the two very different materials of the joint.

» STOCKED IN BLACK, WHITE, IVORY AND RED

The design of the stool is based on traditional archetypes, their basic simplicity in form and function. The organically shaped seat is supported by tapered legs made of oiled European oak.

The seat itself is generously proportioned for comfort, its material tactile and contemporary. The ends of the legs are threaded and screwed into the seat, a connection that is both simple and sophisticated given the two very different materials of the joint.

PRIMARY POUF 01

QUINZE & MILAN DESIGN / 1999

HENRI VAN DE VELDE AWARD

Stripped to the essence, PRIMARY is the first comprehensive Quinze & Milan collection and a line that deserves to be called a Quinze & Milan classic.

PRIMARY kicked off the use of QM FOAM™, a proprietary material developed and produced by Quinze & Milan. Soft materials and a simple design language are a tried-and-true formula for a happy marriage. Not only did POUF 01 receive a triple Henri van de Velde Award (Belgium, 2001), but the sassy character of this comfortable, water-repellent collection has made it a hit worldwide: look for PRIMARY in prestigious public spaces from San Francisco and Detroit to Cannes and Porto.

QUARTZ CHAIR

QUINZE & MILAN DESIGN / 2012

Quinze & Milan tackles geometry once again and has furthered its work on forms and faceting, seeking new effects from wood and creating a chair whose design is a combination of the past and future. Using the most classic of materials, Quinze & Milan has successfully made an object with a symbolic shape in which the material gains qualities of luminosity.

QUARTZ is an object of the future that retains the intrinsic value of wood - strong and hard - wearing, comfortable and basic. ''We wanted to give the material a different look without however ignoring its natural qualities. The facets give a dynamic and vibrant appeal, while the surface plays with the light, creating a sprakling effect. Just like QUARTZ.''

ROOM 26 CHAIR 01

DESIGN QUINZE & MILAN / 2002

ROOM 26 has a look that fuses the familiar and the timeless with ‘something different’, offering an extensive range of products that can transform an interior into a space that shouts ‘26’ or, when used sparingly, can conjure up a room that barely whispers the word. Key to the collection is oak, a material playfully combined with fabric, leather or QM FOAM™.

Selected ROOM 26 items are also available upholstered in leather and fabric. Chair, Barchair and Seat are now all produced with easily exchangeable seating cushions.

It is possible to use and combine different colors of QM FOAM™ and/or fabrics/leather per piece. Colored chairs ONLY available in ASH wood, starting from 20 pieces.

ROOM 26 BARCHAIR 01 KITCHEN HEIGHT

DESIGN QUINZE & MILAN / 2002

ROOM 26 has a look that fuses the familiar and the timeless with ‘something different’, offering an extensive range of products that can transform an interior into a space that shouts ‘26’ or, when used sparingly, can conjure up a room that barely whispers the word. Key to the collection is oak, a material playfully combined with fabric, leather or QM FOAM™.

Selected ROOM 26 items are also available upholstered in leather and fabric. Chair, Barchair and Seat are now all produced with easily exchangeable seating cushions.

It is possible to use and combine different colors of QM FOAM™ and/or fabrics/leather per piece. Colored chairs ONLY available in ASH wood, starting from 20 pieces.

ROUND CAKE

DESIGN DISSING+WEITLING / 2008

Round was originally designed for the University Library, a part of the Danish Royal Library, Copenhagen. Round was created to cater for easy socializing in the lounge areas. By composing the various basic elements it is easy to create a relaxed landscape of seating and socializing possibilities. The new humanities faculty library offers the students a well designed, functional library building designed with singular focus on creating the optimum facility based on users' needs.

The architects from Dissing+Weitling's project group have liaised closely throughout the entire process with a user group of Royal Library employees.

SECOND SKIN SEAT

DESIGN QUINZE & MILAN / 2015

A strikingly simple framework, created from massive lacquered oak, supports a generous piece of leather skin which is wedged between the back and arm rests. Each chair is constucted by hand and totally unique, due to the variety in cut-outs of big pieces of leather and the way they are draped around the framework.

The wink to fashion should be obvious, as well as the reasoning behind its name - although apart from leather, there is also the option of upholstering the chair in the desired color of Kvadrat® fabric. If desired, up to five layers of (contrasting) leather or fabric can be applied to one chair.

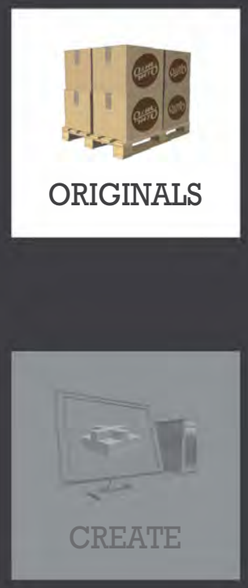

» THE EASY CHAIR, STRIPPED DOWN TO ITS CORE.

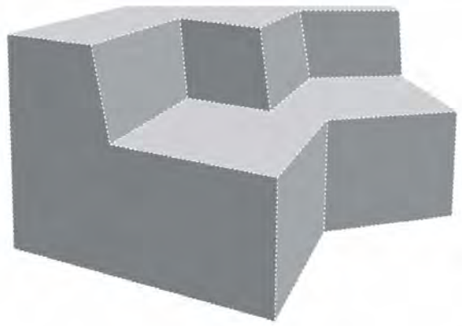

» CHOOSE LEATHER / KVADRAT FABRICS.

» BLACK OAK FINISH AVAILABLE.

QUINZE & MILAN CREATE

CUSTOM FURNITURE - THINK TANK & IDEA FACTORY

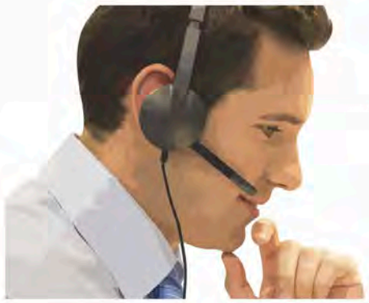

In addition to producing furniture at our in-house factory, we work in close collaboration with designers, architects and specialized manufacturers that make use of Quinze & Milan's proprietary equipment when producing products and designs. The result is the added advantage of flexibility when serving clients with special requirements.

Q&M PROJECTS

All our collections are rooted in specific projects, including public schemes, thus guaranteeing an extensive development phase and thoroughly tested results. We love creating and building for, and with you. Unique shapes, custom upholstry, co-designed and produced with Quinze & Milan.

Check out our project gallery and find out what kind of space solutions we offer for your projects.

Q&M SUPPORT

Ready to get in touch with us and develop your own product? You can start from customizing our standard range or developing complete bespoke products. You can always rely on our knowledge and experience.

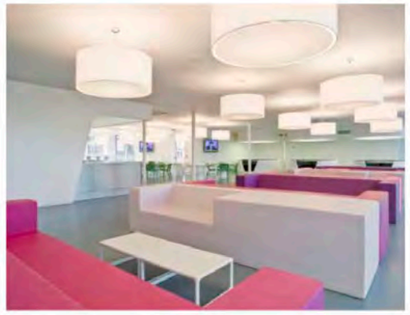

Send us a mail on **info@quinzeandmilan.tv** or call us. We're not a language robot, but we speak 4 languages. So don't be afraid to send us your mail or call us in Dutch, English French or German. We'll be more then happy to help you.

QM FOAM™ SPECIFICATIONS

AUTHENTIC FOAMCOATING, PREMIUM QUALITY.

QM FOAM refers to the result of a chemical reaction between the polyurethane foam shape and different layers, with different compositions, sprayed onto it.

PU FOAM

• Net density:	44kg / m3 (ISO 845)
• Rigidity:	CDL 40% at 6.5 KPa (ISO 338)
• Compression strength:	25% - 200 N / 40% 260 N / 65% 530 N (ISO 2439)
• Permanent deformation:	75% less than 10% (ISO 1856)
• Elongation at break:	100% (ISO 1798)
• Stress resistance:	70 KPa (ISO 1798)
• Crack resistance:	200 N/M (ISO 8067)
• Resilience:	H 40% (ASTM D3574)
• Fire resistance:	B2,CAL117, CRIB5 (other certifications upon request)

DURABILITY
Abrasion: 100.000 Martindale (EN ISO 12947 pt.2)
Aging: Oven test and D.M.A. (=Dynamic Mechanical Analysis)

WEATHER – WATER RESISTANCE
QM Foam is water and weather resistant up and above minus 10 °C. For optimal results, Quinze & Milan advises its customers to use protective covers with pieces for permanent outdoor storage.

TOLERANCE
As an inherent aspect of the specific production process, it is impossible to completely control the retraction of the materials during and directly after the production process. This inevitably leads to minimal dimensional differences.

SAFETY
Our own finished products are certified DIN EN 71-3 (toys for children). This means that QM Foam products may safely be used as toys for small children in almost all European countries.

ECOLOGY
Our products are 100% recyclable. Lifetime can be prolonged by re-spraying and repairing. We have engaged our-selves to take up ecological responibility, through, amongst others, (re-)engineering of our products, packaging and other ways to prolong the lifetime of our products.

UV STABILITY
The color stability when subjected to the sun, is depending on the color. This information is available upon request.

QM PLUS™ SPECIFICATIONS

AUTHENTIC FOAMCOATING, PREMIUM QUALITY.

QM PLUS refers to the result of a chemical reaction between the polyurethane foam shape and different layers, with different compositions, sprayed onto it.

The QM PLUS finishing has 2 layers of the QM Coating which results in surface which has stronger resistance.

PU FOAM

• Net density:	44kg / m3 (ISO 845)
• Rigidity:	CDL 40% at 6.5 KPa (ISO 338)
• Compression strength:	25% - 200 N / 40% 260 N / 65% 530 N (ISO 2439)
• Permanent deformation:	75% less than 10% (ISO 1856)
• Elongation at break:	100% (ISO 1798)
• Stress resistance:	70 KPa (ISO 1798)
• Crack resistance:	200 N/M (ISO 8067)
• Resilience:	H 40% (ASTM D3574)
• Fire resistance:	B2,CAL117, CRIB5 (other certifications upon request)

DURABILITY
Abrasion: 100.000 Martindale (EN ISO 12947 pt.2)
Aging: Oven test and D.M.A. (=Dynamic Mechanical Analysis)

WEATHER – WATER RESISTANCE
QM Plus is water and weather resistant up and above minus 10 °C. For optimal results, Quinze & Milan advises its customers to use protective covers with pieces for permanent outdoor storage.

TOLERANCE
As an inherent aspect of the specific production process, it is impossible to completely control the retraction of the materials during and directly after the production process. This inevitably leads to minimal dimensional differences.

UV STABILITY
The color stability when subjected to the sun, is depending on the color. This information is available upon request.

QM TEX™ SPECIFICATIONS

QM TEX, COATED REINFORCED TEXTILE

QM TEX is QM Coating applied to textiles. The result is a stiff and strong material, very durable, virtually tear-proof and easy to clean. The interest of this innovation is to meet the growing need of invulnerability associated with furniture solutions, walls, reception desks, while maintaining a soft touch.

Like most of our products, QM Tex allows a wide range of possibilities for customization: wide choice of colors, shapes, patterns, as well as the possibility to combine different materials with diverse mediums and kinds of coating, maintaining our known quality standards for the final product.

PU FOAM

• Net density:	44kg / m3 (ISO 845)
• Rigidity:	CDL 40% at 6.5 KPa (ISO 338)
• Compression strength:	25% - 200 N / 40% 260 N / 65% 530 N (ISO 2439)
• Permanent deformation:	75% less than 10% (ISO 1856)
• Elongation at break:	100% (ISO 1798)
• Stress resistance:	70 KPa (ISO 1798)
• Crack resistance:	200 N/M (ISO 8067)
• Resilience:	H 40% (ASTM D3574)
• Fire resistance:	AM18, CAL117, CRIB5 (other certifications upon request)

The color stability when subjected to the sun, is depending on the color. This information is available upon request.

UPHOLSTERY & WOOD

WE'D BE HAPPY TO WORK WITH YOUR OWN MATERIALS, TOO.

UPHOLSTERY OPTIONS

CAT 1
Fabrics from known manufacturers such as Stamskin (type Zen), Gabriel(Crisp and Step), Vescom (Furka). Depending on the technical properties of these fabrics, the necessary certificates can be supplied.

QM CAT 2
Medium range fabrics from manufacturers such Stamskin (type One), Rohi (Novum) , Kvadrat (Remix), A top finish to our Quinze & Milan furniture.

QM COM
Customer owned materials. The customer can supply his fabric.

ATTENTION

Depending on the specific fabric, Quinze & Milan may have to consider minimum quantities per color code. For QM Leather collection, minimum quantity per color is 5,5 sqm.

C.O.M.

As much as possible we have tried to indicate the quantities needed in case you send us your fabric or leather to produce the items. (See also QM Terms & Conditions of Sale)

TECHNICAL SPECIFICATIONS

All fabrics selected in our collections correspond to extremely high levels of quality in terms of Abrasion-value, lightfastness, shrinking, ... (more info can be obtained from our sales network)

Simply the best.

- Q&M'S TEAM OF DESIGNERS AND CRAFTSMEN SOURCE THE HIGHEST QUALITY MATERIALS ON THE MARKET.
- IN-HOUSE AND INDUSTRY-LEADING PRODUCTION.
- WE'D BE HAPPY TO WORK WITH YOUR OWN MATERIALS.

COLOR SWATCHES

Based on our technology we will match the indicated colors as precise as possible. We may match practically any clearly defined color, specified according to an international color system like NCS and RAL. Minimal color differences for every production batch are unavoidable.

UV STABILITY INDICATION

Less Stable ■■■■ Highly Stable

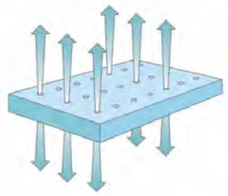

TECHNICAL SPECIFICATIONS

AUTHENTIC PREMIUM QUALITY FOAMCOATING

Custom Shapes

QM Foam can be cut into custom shapes. **Contact us for more information.**

Airvent Technology

All QM Foam pieces now feature built-in Airvents, which help aerate the foam cells and prevent our designs from losing shape.

Water Repellent

QM FOAM is water and weather resistant up and above minus 10 °C. For optimal results, Quinze & Milan advises its customers to use protective covers with pieces for permanent outdoor storage. **More information on QM Foam here.**

Add Your Logo

For your specific commercial project needs, Quinze & Milan developed a paint-based technique which allows us to add your logo, text or graphics directly on the QM FOAM surface, without use of stickers. This way, the graphics stay as flexible and elastic as the foam itself.

Sound Absorbing

Our QM Foam is sound absorbing. **More information on QM Foam here.**

Wood Finishing

Standard natural oak finishing.
Oak finishings (black/white washed) upon request

Sun Proof

The sun is on our side. QM Foam contains a UV filter to prevent fading from the sun.

CLEANING GUIDE

KEEPING YOUR BELOVED QM FOAM FURNITURE IN SHAPE

Quinze & Milan pieces in Original and Heavy Duty QM FOAM are on their best when maintained and cleaned on a frequent basis. For daily cleaning, luke water and a soft detergent, whiped with a wool cloth will do the trick.

Intensively used pieces will require intensive cleaning, so please take a minute to browse through this page.

Feel free to **contact us** if you'd have any further questions about Quinze & Milan products or services.

FREQUENT CLEANING

WATER

›› Add luke water
›› Add a soft detergent
›› Clean with wool cloth

SUPERFOAM SPRAY

›› Add SuperFoam spray
›› Wait 1-2 minutes
›› Clean with wool cloth

INTENSIVE CLEANING

WATER

›› Add luke water
›› Wait 1-2 minutes
›› Clean with the melamine sponge
›› Clean with wool cloth

SUPERFOAM SPRAY

›› Add SuperFoam spray
›› Wait 1-2 minutes
›› Clean with the melamine sponge
›› Clean with wool cloth

CLICK AND PLAY THE CLEANING GUIDE MOVIE!

QUINZE & MILAN COMMUNITY

A PLATFORM FOR CREATIVE COLLABORATIONS

Quinze & Milan is not a typical furniture label but a platform for collaborations, a think tank and factory of ideas, designs, concepts and experiments.

It's this approach that made Quinze & Milan turn into a successful label that guarantees rock 'n roll, creativity, comfort, quality, excitement and ingenuity.

A PLATFORM FOR CREATIVE COLLABORATIONS

Quinze & Milan

Pumped by QM's authentic values, an in-house team of creatives translates the QM lifestyle and spirit into working designs for a broad range of projects, becoming infectious creations that pull you into their self-shaped sphere and hold you captive. Constantly seeking for innovative collaborations and designs, the team works as a laboratory testing out new materials and ideas.

Wiel Arets

Wiel Arets investigates and produces space in response to life, the potential of function, the character of place and the nature of material. As well as bespoke architecture and urbanism on every scale, the studio develops products for mass production in collaboration with leading manufacturers.

Jürgen Mayer H.

Founded in 1996 in Berlin, Germany, J. MAYER H Architects' studio focuses on works at the intersection of architecture, communication and new technology. From urban planning schemes and buildings to installation work and objects with new materials, the relationship between the human body, technology and nature form the background for a new production of space. Jürgen Mayer H. is the founder and principal of this crossdisciplinairy studio. He studied at Stuttgart University, The Cooper Union and Princeton Universtiy. His work has been published and exhibited worldwide and is part of numerous collections including MoMA New York and SF MoMA.

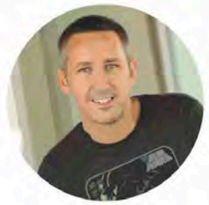

Concrete Amsterdam

Concrete hosts different disciplines such as product and interior designers, architects, visual marketeers and now an urban planning/architectural fi rm too. Concrete's deliberate choice of breaking away from traditional hierarchies and the dominant forces which dictate the design process today, gives our agency unprecedented freedom. Concrete's designers want to be inspired not just by modern art but by comics too, by ideas from the world of architecture and multimedia, by haute cuisine and the snack bar. They appear contradictory, but, in this collision, the perfect expression of our post-modern age can be found.

MEET THE CREATIVES

A PLATFORM FOR CREATIVE COLLABORATIONS

Scott Wilson

Scott Wilson is founder of MINIMAL, a multidisciplinary design studio. He's an accomplished designer experienced in developing iconic, industry-leading products. His alternating experience within three consulting firms and four global corporations has provided him with the skills necessary to navigate through companies and industries consistently delivering compelling consumer concepts to market.

David Weeks

David Weeks is one of America's leading designers. His award-winning lighting is installed in high-profile locations throughout the world, in addition to his innovative furniture, household products and toys. Weeks founded New York-based David Weeks Studio in 1996. Since then, he has created products for commercial and residential uses, from desk lamps and home accessories to floor lamps, chandeliers, mobiles, lounge seating and commercial and residential lighting installations.

Clive Wilkinson & Intelligent Design

Clive Wilkinson founded Clive Wilkinson Architects in Los Angeles in 1991. He was educated as an architect at the University of Cape Town in South Africa and at the Architectural Association in London. His background includes extensive experience with the design of cutting edge commercial and institutional projects, ranging from large scale new construction in Britain to the interior architecture of some of the world's most creative and leading edge companies. Honeycomb for Quinze & Milan was conceived in collaboration with Intelligent Design in Portland, USA.

Marc Thorpe

Since the establishment of Marc Thorpe's studio in 2005 he has been working in New York producing residential and commercial architectural projects as well as an extensive body of work in the fi eld of furniture design. Thorpe's work can be defi ned as routed in function with a sensibility to character through detail. As a young practicing architect in New York City, he carries over his training to furniture design by exploring the impact a given program has on a products form in relation to its performance. This pluralistic approach to design gives Thorpe's work relevance and inherent meaning.

MEET THE CREATIVES

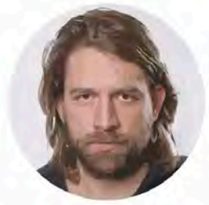

A PLATFORM FOR CREATIVE COLLABORATIONS

Hosoya Schaefer Architects

Hosoya Schaefer is a Zürich based studio for architectural designs, strategies and research. It was founded by Markus Schaefer and Hiromi Hosoya in 2003. With an international network of collaborators, the studio is involved in building design and realization, media installations, strategic planning and consulting. Past teaching engagements link the studio to the Department of Architecture at Cornell University in Ithaka, NY and the Berlage Institute in Rotterdam.

Büro Wehberg

Büro Wehberg is a Hamburg based studio for design and art, founded by Max Wehberg in 1999. Their multi-disciplinary projects range from artistic project development, realization and consulting for commercial clients, production of design products to stage design and artworks. ‘‘We see Quinze & Milan as a furniture label with a lot of possibilities and a continuation of the DNA of our company. We make it happen for designers and architects and we love to work with a lot of different people.’’

Kazuko Okamoto

Kazuko Okamoto’s —born in Chiba, Japan but currently living in Milan - interests lie in furniture and product-design. In the past she has made tables, shelves and chairs but also cups and plates. Foam and oak wood are her favorite materials to create furniture as the first has the most flexible form you can play with and the second is all about nature. After working in a company she stepped in the world of freelancers, exactly what Quinze & Milan was looking for.

Thomas Tritsch

Thomas Tritsch founded the design and furniture brand MORGEN in 1997 together with Sabine Mühlauer. He studied art and made his master in environmental installations. When creating spaces like the COCOON VIP LOUNGE, a hotelsuite for Juan Amador, offi ces for Sven Väth, Bread and Butter or Red Bull his mainly influenced by this artistic view. One of his favorite cre-dos is forming things as simple as possible and creating spaces packed and stuffed with electrifying excitement.

Dissing + Weitling

Dissing+Weitling's goal is to create optimal spaces for human activity – at work, in the home and in the public sphere. They have a clear and accommodating approach, characterized by user-centric solutions that pay particular attention to the physical, cultural and environmental context of each project. The company has refined and developed this Scandinavian design tradition with works that have set new standards in both design and architecture.

KiBiSi

Founded by Kilo Design (Lars Holme Larsen), BIG, (Bjarke Ingels) and Skibsted Ideation (Jens Martin Skibsted), KiBiSi is a Copenhagen based idea-driven industrial design fi rm. Each partner contributes with intelligence and experience from within his specifi c fi eld providing KiBiSi with cutting edge knowledge and knowhow within the fields of architecture, design, furniture, electronics, transport, contemporary culture and lifestyle.

''We believe the product should be the carrier of its brand idea rather than some designer's form and formula. In the fertile overlap between Design, Architecture and Ideation we seek to spawn a new breed of idea driven design

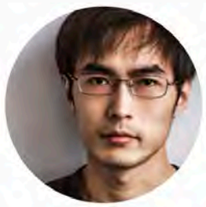

Søren Rose

Artist, designer, merchant, entrepreneur with a highly developed sense of quality, craftsmanship and a global outlook of the things that will live past our time. That, together with a healthy dose of humor and a tongue- in-cheek approach to life in general, is the DNA of Søren Rose. It is also the essence of Søren Rose Studio.

Jakob + MacFarlane

Jakob+MacFarlane is an architectural firm based in Paris, founded by Brendan MacFarlane and Dominique Jakob. Its work explores digital technology both as a conceptual consideration and as a means of fabrication, using new materials as a possibility to create a more flexible, responsive and immediate environment.

Zhili Liu

Zhili Liu was born in Chengdu (Szechwan, China) in 1979. In 2005, he started working for NHDRO/Design Republic in Shanghai as a furniture and product designer. In 2009, Zhili Liu was appointed senior designer at Shang-xia, a new luxury goods brand founded by Hermes. He's planning to set up his own studio in 2010.

MEET THE CREATIVES

A PLATFORM FOR CREATIVE COLLABORATIONS

Patrick Rampelotto & Fritz Pernkopf

Patrick Rampelotto, born in Sterzing (Italy), started studying law at the Leopold-Franzens-Universität in Innsbruck before changing to the University of Applied Arts Vienna in order to study industrial design. After receiving his diploma Rampelotto worked at the EOOS design studio and since 2009 as an independent designer in the areas of shop and furniture design as well as fashion accessories. Objects of the artist have found their way into the collections of, e. g., the Imperial Furniture Collection Vienna, the Wien Museum as well as the Křehký Gallery.

He developed the Pilot range together with industrial designer Fritz Pernkopf also from Vienna.

Lionel Doyen

Born and raised in the Var region of France, I made my foray into art world through graffiti. After earning a master degree in industrial design, I went to work in Lyon, Paris and Londen. Following a ten-year stint at various international agencies specialized in industrial design and commercial office architecture. In 2008 I settled in Lille and began working with the Belgian brand of contemporary furniture Quinze & Milan. Today I'm launching my own design studio with a more personal and experimental approuch to product / services design and development.

FIVE AM Kortrijk

FIVE AM is a Belgium based design studio, specialised in creating concepts ranging from interiors, temporary installations to product design. By keeping our focus on simplicity during the entire design process, each concept obtains its own unique and recognisable image.

Anton Hendrik Denys

No matter what I design, I always try to approach things with an architectural point of view. I love rich materials, in combination with minimalistic shapes. Next to that I'm also a big fan of contrasts; exciting and unexpected material combinations. Using a recycled material, that doesn't look luxurious or chic at all and turning it into something very precious,... Giving an unique, measure made materiality, atmosphere and individuality to a project, is what I find the most challeging and fulfilling.

SALES & PRICING

CUSTOM FURNITURE - THINK TANK & IDEA FACTORY

In addition to producing furniture at our in-house factory, we work in close collaboration with designers, architects and specialized manufacturers that make use of Quinze & Milan's proprietary equipment when producing products and designs. The result is the added advantage of flexibility when serving clients with special requirements.
